GAGEtrak® Cloud

The World's #1 Calibration Management Software
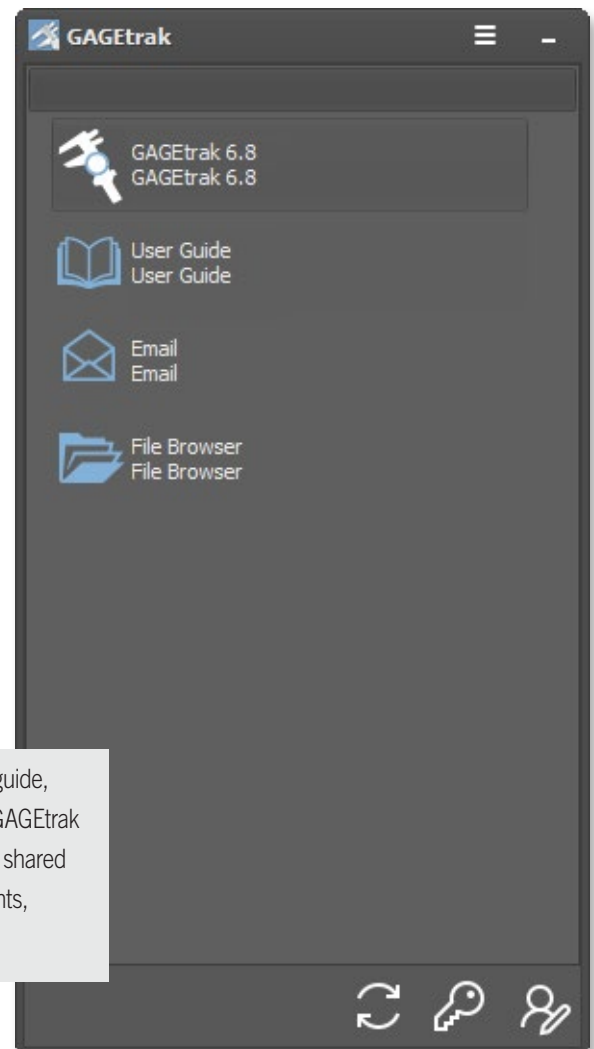

Welcome to GAGEtrak Cloud

GAGEtrak Cloud hosted calibration management software delivers quick and easy access to the full functionality of GAGEtrak through the Internet with a responsive, robust and rich desktop-like experience for the user. The hosted version of GAGEtrak is a deeper, more sophisticated, more reliable product than others of its kind. And, unlike other providers, we stand behind our products and services every step of the way, from your initial consultation to deployment, data storage and delivery.

- Deploy quickly and effortlessly
- Minimize software licensing costs
- Reduce IT hardware and data storage costs
- Eliminate the time and money spent on typical software maintenance
- Improve scalability

You don't have to be concerned about operating system requirements, hardware, drive space or database systems and you don't have to incur the associated costs or spend time on setup and maintenance. We take care of everything behind the scenes: software installation, software updates and the secure storage of your database.

Because GAGEtrak Cloud can be accessed for a small monthly subscription fee, it is the perfect solution for new facility start-ups, those with limited IT budgets and even larger companies that need to roll out to multiple locations. GAGEtrak Cloud allows gage and calibration data to be shared between facilities and with a mobile workforce, outside calibration labs and customers. Real-time access to the most current data ensures time and cost efficiency throughout your operation.

With a solid track record spanning more than two decades, GAGEtrak is the calibration management software solution of choice for thousands of facilities spanning over 70 countries. While many providers may be new to the world of cloud computing, we've been developing cloud-based applications for over a decade. Among our hosted clients are Fortune 100 companies, government agencies and FDA-regulated manufacturers.

The GAGEtrak Cloud virtual desktop is the access point for the GAGEtrak software, user guide, email and data storage. The email feature is provided for the convenient transmission of GAGEtrak reports. The file browser allows each user to securely access both a private drive and the shared corporate drive for housing the GAGEtrak database and file attachments, such as blueprints, procedures and calibration certificates.

Security and Compliance

Your Transactions and Data Are Secure: Connections to GAGEtrak Cloud are made using a 256-bit SSL encrypted tunnel to facilitate encrypted data exchanges. This means that your data is completely encrypted while transmitting via the Internet. This is the same technology that online credit card processing, banking and government agencies use to ensure secure exchange of data via the Internet.

ISO/IEC 27001 and ISO 9001 Certified: Our hosting partner's network operations center is regularly assessed and is ISO/IEC 27001:2005 (Information Security Management Systems) and ISO 9001:2008 (Quality Management Systems) certified. These standards ensure that we deliver the highest level of quality and information security to our clients.

Utilize Local Resources

GAGEtrak Cloud also allows you to utilize local printer resources, such as the Calibration Label Kit which generates durable, laminated, bar-coded calibration labels directly out of GAGEtrak. The compact Brother® printer (PT-9700PC desktop or PT-9800PCN network) comes complete with cables, label design software and everything else you'll need to get started.

GAGEtrak Details

Learn more about how you can use GAGEtrak to monitor scheduled and unscheduled calibrations, track gage locations, retrieve calibration records, produce calibration certificates and bar-coded calibration labels, conduct gage R&R analysis (MSA 4th Edition), create thorough, customized reports and so much more. **Click here for the full GAGEtrak brochure.**

Free Trial

Not sure which version of GAGEtrak is right for you? One of our GAGEtrak experts will gladly advise you on the ideal version, set-up and use of GAGEtrak for your company's unique needs, goals and compliance requirements.
