

GAGetrak[®] 7 Report Viewer

GAGetrak 7 Report Viewer

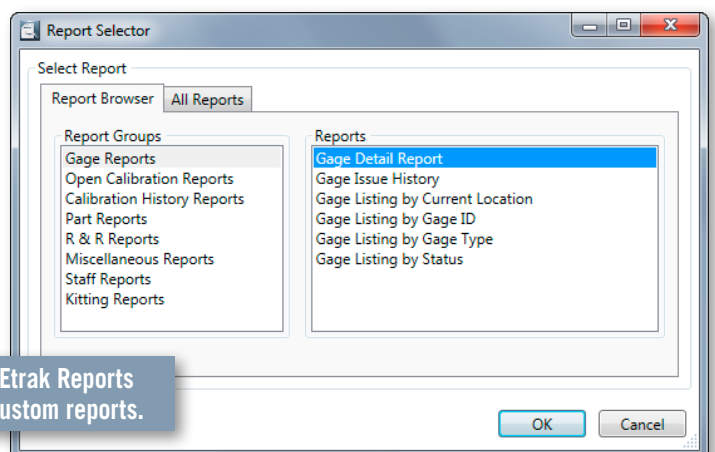

Report Viewer is an easy-to-use, stand-alone desktop utility that allows you to generate thorough reports to analyze and stay ahead of trends, forecast workloads, improve efficiency and minimize costs.

Report Viewer connects to your GAGetrak database (version 7.0 or higher) allowing you to access all standard GAGetrak reports as well as any edited or custom reports that are created within GAGetrak. If you have multiple databases, switching back and forth between them is quick and easy.

Report Viewer Pro

Report Viewer Pro edition offers all of the functionality of Report Viewer as well as a custom report designer to modify existing reports and create your own.

GAGetrak Settings

Because Report Viewer connects directly to your GAGetrak database, your User Info settings (including company name, division name and company logo) and Report Control ID text settings (for document control) are all active in Report Viewer.

Filters

Report Viewer's Advanced and Quick Filters are exactly like the report filters in GAGetrak to easily generate reports for the specified criteria.

Report Viewer offers the convenience and simplicity of accessing only the information you need, allowing you to have more control over your quality management program. Contact us today for a free, personalized web demonstration to see Report Viewer in action.

Security

Report Viewer utilizes the same security system that is built into GAGetrak, so anyone with a GAGetrak user account can access reports in Report Viewer.
