

GAGetrak[®] 7 Trigger Code Instructions

Please refer to the GAGetrak Getting Started Guide for installation and database upgrade instructions.

A Trigger Code is required to register your GAGetrak license. After installation, obtain a Trigger Code using the instructions below. If this is not completed within 30 days of installation, GAGetrak will inform you that the trial period has expired. Obtaining a Trigger Code will remove this expiration:

1. Click the GAGetrak application icon  in the upper left corner of the screen and then from the **Help** menu, select **About**. In the **Serial Number** text box, enter the Serial Number that is located on a sticker within your product packaging. Then, click the **Register License** button. The Register License window will open.
2. Click the **Get Trigger Code Online** button or open a Web browser window and go to: <https://register.cybermetrics.com/>. Enter the required information on the web page and then click **OK**. On the next screen, enter the **Code Entry** and **Computer ID** codes from GAGetrak's Register License window and click **Get Code**. Your Trigger Code will then be displayed. Enter this Trigger Code into the **Trigger Code** text box in GAGetrak's Register License window and click **OK**.

Follow the above instructions at each workstation on which GAGetrak is installed. Your GAGetrak license will remain registered for the current Windows account on the workstation even if GAGetrak is reinstalled in the future.

Thank you for choosing GAGetrak, the #1 Calibration Management Software Solution in the world.
