

# FEATURE COMPARISON

	PRO	LITE
Flexible calibration scheduling, including schedule pausing and reminders	✓	✓
Additional scheduling options for activities, crib transfers and MSA studies	✓	
Configurable interface elements such as split screens, column selectors, saved views and filters	✓	✓
Gage templates and data management tools: Create pre-defined gage templates for easy and consistent record creation. Records created from templates can also be linked to make batch record updates. Use the drop-down list management and find/replace tools for quick data cleanups in commonly used fields.	✓	✓
Procedure management: Create, link and manage calibration procedure instructions for your measurement and test equipment.	✓	✓
Custom measurement formulas: Use the formula manager to pre-configure and automatically convert measurement results, such as Celsius to Fahrenheit conversion or average readings.	✓	✓
Automatic frequency adjustment and cost curve analysis: Adjust calibration frequency based on NCSL guidelines. Use the cost curve analysis tool to determine the cost of out-of-tolerance or failed calibration.	✓	
Group-level security module: Create security groups for various levels of user access.	✓	✓
Archive manager: Use the archive manager application to remove data clutter and to restore database performance.	✓	✓
Industry-standard reports including pre-formatted gage details and calibration certificate, and performance reports	✓	✓
Ad-hoc reporting: Create configurable report listings from any view, on the fly.	✓	✓
Calibration due listing dashboard, reminders and drag & drop calendar	✓	✓
Enhanced due listing dashboard including activities, crib transfers & MSA schedules	✓	
Custodian management: Store detailed information for your suppliers, staff and customers to easily monitor how they interact with your gages.	✓	✓

	PRO	LITE
Helpful data entry and record management tools, such as gage cloning, find and replace and drop-down list management	✓	✓
Crib and service request management: Gage transfers can follow two-step transactional or single-step routing models; transfer a single gage or multiple gages in a batch and apply configurable routing rules to fit your needs.	✓	
Electronic calibration signatures: Protect historical records with multi-level, pre-definable calibration signature options. Users can sign calibration records using any number of designated signers.	✓	✓
Complete gage life cycle tracking: Provides Where Used and enhanced History tabs, allowing users to see multiple aspects affecting a gage over its entire life cycle including products and characteristics.	✓	
Measurement Systems Analysis: MSA suite including Gage R&R, Linearity and Stability studies	✓	
Notification manager: Provides enhanced email automation, which can be used to regularly email reports and due listings to specified recipients, as often as needed and on any days you choose.	✓	✓
Gage event notifications: Use the notification manager module to send automatic emails when certain gage events occur, such as calibration failure notices and gage status changes.	✓	
Latest Microsoft .Net Technology Stack	✓	✓
Support for Microsoft SQL database (including Azure SQL Instance) as well as PostgreSQL	✓	✓
Compliance: ISO 9001:2015	✓	✓
Compliance: IATF 16949:2016	✓	
Compliance: ISO 13485:2016	✓	✓
Compliance: ISO/IEC 17025:2017	✓	
Compliance: AS9100	✓	✓
Compliance: AS13100	✓
