

GAGetrak® Lite

Software Update Version 8.1.3

Resolved Issues and Enhancements

Category	Description
Issue Resolved	Unexpected error when trying to print calibration label/open report and linked to a SQL Server database - Wrong version of SQL Server was used when Issue Resolved was reported.
Issue Resolved	Unhandled exception when not selecting a Procedure and clicking OK.
Issue Resolved	Unhandled exception occurred when not selecting an Attachment and clicking OK.
Issue Resolved	Unexpected error occurred creating a calibration record from Dashboard.
Issue Resolved	Procedure was not locked after being used in a calibration record.
Issue Resolved	GAGetrak 8 Install did not accept Extraction Code on French Windows 10.
Issue Resolved	GAGetrak 8 Extraction code not valid when OS is in Spanish.
Issue Resolved	Record counter didn't match amount of records when Grouped by and Filter are used.
Issue Resolved	GAGetrak Service needed to be restarted after making changes to Auto Cal Due Settings.
Issue Resolved	Test point data lost when moving to another gage record before saving.
Issue Resolved	Unexpected error occurred when cloning a gage and Gage Auto Number was enabled.
Issue Resolved	Test point data lost when moving to another calibration record before saving.
Issue Resolved	Creating SQLite Database on new installation had error.
Issue Resolved	Invalid credentials when reconnecting to SQL Server database.
Issue Resolved	Send email button was cut off in Spanish (button to Send report via e-mail).
Issue Resolved	Asset No label displayed instead of Accounting No.
Issue Resolved	Status checkbox to include in Due List didn't prompt to save when making changes a second time.
Issue Resolved	Gage ID was cleared after cloning filtered gage.
Issue Resolved	Build number in About window didn't match setup file version.
Issue Resolved	Unhandled exception error when opening attachment and leaving it open for a few minutes - Could not duplicate exception with png or Word document. Log file did not specify that any of our code is involved in the exception, but the code that opens the file might be involved. In case this is duplicatable by users, added an exception.
Issue Resolved	Data Utility - Error experienced upgrading a SQLite database to MSSQL (within version).
Issue Resolved	Clicking Clone Gage resulted in "An unexpected error occurred; GAGetrak Lite will need to shutdown. Please contact technical support."
Feature or Change Request	RadGrid Filter paging did not match Grid paging in GtLite.
Feature or Change Request	Standard WPF Controls were difficult to view in High Contrast Theme.
Feature or Change Request	Gage Next Due Label printed from Calibrations or from Report Viewer - Calibrated By displays in all Gage Due Labels.
Feature or Change Request	Settings -> Info tab -> State: State abbreviations display in caps.
Scheduled Item	Under Calibrations, changed mouse-over word for Last Record in Spanish.
